## How to play

Older children can use The whole deck of 52 cards, But younger children May want to use fewer cards. Make sure the deck you use is made up of pairs.

---

Shuffle And spread cards facedown on a table between players. Cards can be laid in a random pattern or in a grid. The object of the game is to find matching pairs. Players take turns turning over two cards and letting all the players see them and study them. If they are not a matching pair, try to remember what and where they are, then turn them back over. The next player turns over two cards. If they are a matching pair, that player removes them from that table and keeps them, and then has another turn. When all the cards have been removed from the table, each player counts up the number of cards that stay collected. The play with the most cards wins!!
